PROFESSIONAL SUMMARY

Motivated Computer Applications student with strong fundamentals in software engineering, web development, network security, and cryptography. Hands-on experience building full-stack detection systems and Python-based security tools involving symmetric encryption algorithms and password auditing. Proficient across multiple programming frameworks, database management, and artificial intelligence fundamentals.

TECHNICAL SKILLS

- **Programming Languages & Frameworks:** Python, C, C++, Java, JavaScript, ASP.NET, Flask, React, SQL, HTML, CSS
- **Databases & Developer Tools:** MySQL, Git, GitHub, VS Code, Linux, Unix
- **Core Computer Science Concepts:** Data Structures & Algorithms (DSA), Cryptography, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

TECHNICAL PROJECTS

Network Intrusion Detection System (NIDS) (In Progress) | *Python, Flask, React*

- Designing a web-based network intrusion detection system to analyze network traffic and inspect packets for anomalies in real time.
- Developing an interactive dashboard with React for visual telemetry and Flask for backend packet processing, threat analysis, and security logging.

Password Generator & Strength Checker | *Python, Cryptography*

github.com/NisargPatel2211/Password-Generator-and-strength-checker

- Developed a security utility in Python to generate customizable, high-entropy passwords and evaluate real-time strength using complexity scoring algorithms.
- Implemented encrypted credential storage using Python cryptographic modules to secure sensitive user data.

File Encryption & Decryption Tool | *Python, Cryptography*

github.com/NisargPatel2211/File-Encryption-and-Decryption

- Engineered a file security application executing end-to-end symmetric encryption and decryption on local files.
- Applied secure key derivation logic and secret key management to prevent unauthorized data access.

CERTIFICATIONS

- Getting Started with Artificial Intelligence — IBM SkillsBuild (Jul 2026)
- Lab: Troubleshoot Your Code Using IBM Bob — IBM SkillsBuild (Jul 2026)
- Introduction to C++ — Simplilearn SkillUP (Mar 2025)
- Introduction to CSS — Simplilearn SkillUP (Mar 2025)

EDUCATION

Bachelor of Computer Applications (BCA)

Sardar Vallabhbhai Global University — Ahmedabad, Gujarat | 2024 – 2027 (Expected)

Higher Secondary Certificate (HSC)

H.B. Kapadiya School — Ahmedabad, Gujarat | Graduated: 2023 — Score: 70%

Secondary School Certificate (SSC)

SKUM School — Ahmedabad, Gujarat | Graduated: 2021 — Score: 72%

LANGUAGES

- **English:** Professional Working Proficiency
- **Hindi:** Fluent
- **Gujarati:** Native
